IN SPILL CONTROL

Since 1999

Why buy from Chemtex?

- ◆ With over 20 years in business and counting, Chemtex has the knowledge and experience that you can trust.
- ◆ Our commitment to service is second to none. In our eyes, the customer always comes first.

Service with a smile

- ◆ Quality you can count on. We are committed to providing high quality products consistently on every order. We make it, we sell it, we guarantee it.

SPILLS HAPPEN

We get it, that's why we inventory multiple trailer loads of spill response products at all times. Let Chemtex give you the peace of mind knowing we can respond to spills 24 hours a day 365 days a year.

7 STEPS TO SPILL RESPONSE

Chemtex products are used in the various different stages of spill response.

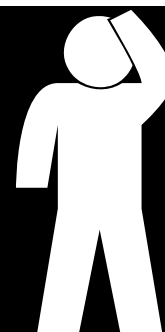

- 1 - Assess the risk
- 2 - Select personal protective equipment
- 3 - Confine the spill - speed counts!
 ● Chemtex sorbents work here!
- 4 - Stop the source
- 5 - Evaluate incident/Implement clean up
 ● Chemtex sorbents work here!
- 6 - Decontaminate
 ● Chemtex sorbents and containment products work here!
- 7 - Complete required reports

CONFUSED ON WHAT PRODUCTS TO BUY WHEN IT COMES TO CLEANING SPILLS?

With so many different kinds of sorbents on the market, how do I know what Spill Response Products are right for my application?

HERE ARE SOME COMMON QUESTIONS AND ANSWERS to help you make your selection easier.

Q What color and or type of sorbents do I buy, White - Oil Only, Gray - Universal, or Yellow - Hazmat?

A Refer to the chemical application guide on page 2 for a list of common industrial fluids. Choose the sorbent that best suits your needs...

- 1- Oil Only, for petroleum and petroleum based chemicals - Refer to pages 22-38
- 2- Universal, for water and water based chemicals - Refer to pages 6-20
- 3-Hazmat, for aggressive chemicals - Refer to pages 40-44

Q Regarding sorbent pads and rolls, what durability type do I choose?

A Refer to durability rating of pads and rolls on page 3 for the explanation of the 5 different options.

Choose the sorbent that best suits your needs...

- 1 Standard Meltblown ★★
- 2 Dimpled Meltblown ★★★
- 3 Bonded Meltblown (SM) ★★★★★
- 4 Fine Fiber Meltblown (FMF) ★★★★★★
- 5 Bonded Meltblown (SMS) ★★★★★★

Q Regarding sorbent pads and rolls, how do I know what basis weight to buy?

A This is a 2 part answer.

First ask yourself if you are using these pads for emergency spill response on a large volume spill or are they being used in day to day maintenance operations to catch leaks and drips from equipment or machinery?

If using for spill response then go with the heavy weight because this will allow you to use fewer pads which will reduce your time and labor on the cleanup.

If using the pads and rolls for MRO then you can usually go with the lighter weight pads as they will give you more surface area to cover and they are used more for drips and sprays instead of being fully sorbed. This way, when you throw away a dirty pad, you can be assured that you are not wasting any unused sorbent.

Durability Rating of Pads & Rolls

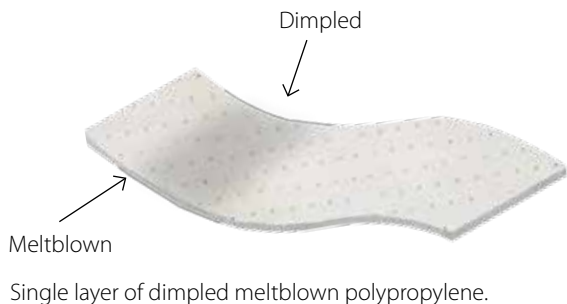

Pads & Rolls

Standard Meltblown ★★

Single layer of standard fiber meltblown polypropylene

- ◆ Fast-absorbing with an economical price
- ◆ Contractor Grade
- ◆ No perforations
- ◆ Highly Absorbent
- ◆ For short-term use

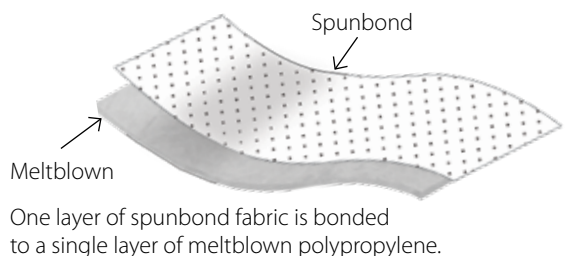

Pads & Rolls

Dimpled Meltblown ★★★

Single layer of dimpled meltblown polypropylene.

- ◆ Stronger than Standard Meltblown pads & rolls
- ◆ The dimples reduce linting in pads & rolls
- ◆ Perforated every 7.5" vertically and 19" horizontally to waste less

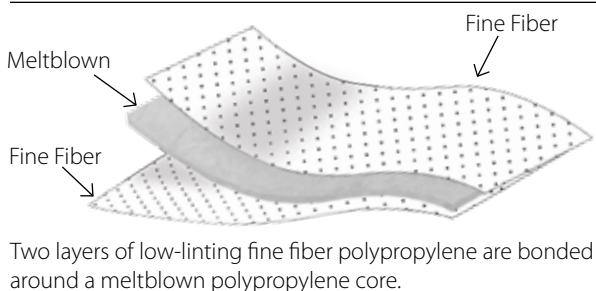

Pads & Rolls

Bonded Meltblown (SM) ★★★★★

Two layers bonded together: 1 spunbond fabric layer, 1 polypropylene layer

- ◆ Stronger tensile strength than the dimpled pads & rolls
- ◆ One side is lint-free that can be used for wiping
- ◆ Perforated every 7.5" vertically and 19" horizontally to waste less

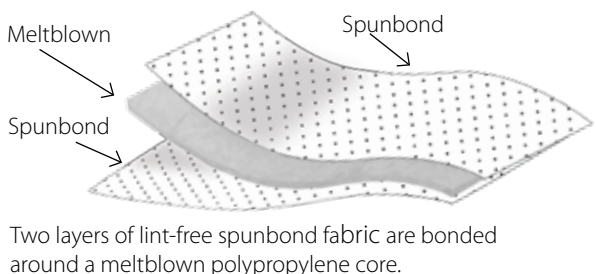

Pads & Rolls

Fine Fiber Meltblown (FMF) ★★★★★★

Three layers bonded together: 2 layers of low-linting fine fiber polypropylene with a 1 layer meltblown core

- ◆ Super-strong tensile strength
- ◆ Very low lint
- ◆ Grips floors
- ◆ Perforated every 7.5" vertically and 19" horizontally to waste less

- ◆ No lint
- ◆ Perforated every 7.5" vertically and 19" horizontally to waste less

Are you still using clay to clean your leaks, drips and spills?

If so why? Sorbents: Clay vs Poly

You may think you're saving money because the cost of a bag of clay is so cheap, but in reality you are spending more—a lot more! In addition to the financial savings that we list below, these are a few other reasons not to use clay:

- ◆ Clay is very messy; cleanup is difficult and labor-intensive.
- ◆ Clay is an abrasive, which causes damage to machinery and moving parts.
- ◆ Silica is considered a serious health hazard by OSHA.
- ◆ Clay is heavy to work with compared to polypropylene pads.
- ◆ Clay is not a good absorbent.

To learn more details about clay vs. polypropylene, please call our office and ask to speak with a customer service representative.

Universal Fine Fiber Meltblown (FMF) Pads & Rolls

The highest quality pads and rolls we manufacture.

Two layers of low-linting fine fiber polypropylene are bonded around a meltblown polypropylene core.

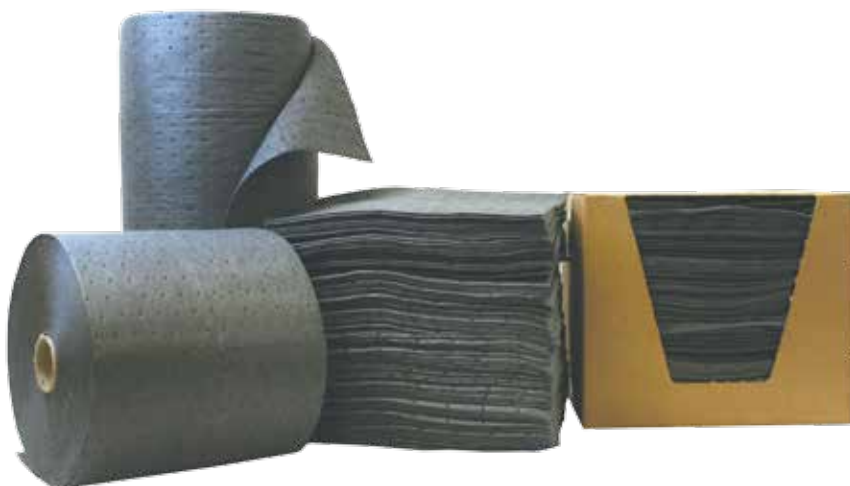

- ◆ Super-strong tensile strength
- ◆ Very low lint
- ◆ Grips floors
- ◆ Perforated every 7.5" vertically and 19" horizontally to waste less

APPLICATIONS:

- Industrial
- Automotive

ABSORBS:

- Oil
- Water
- Water-based chemicals

Both pads and rolls are used to contain and absorb splashes and spills under and around machinery.

The fine fiber polypropylene increases the strength and durability of the pads and rolls so they can be perforated like a paper towel. Perforations will help reduce waste and allow you to use the exact amount needed for the job.

Using fine fiber increases the strength, which enables pads and rolls to grip surfaces securely.

Our Universal Fine Fiber Meltblown (FMF) Pads & Rolls are constructed with 3 layers of polypropylene:

- 1 - Fine fiber
- 2 - Meltblown core
- 3 - Fine fiber

Universal pads & rolls are used to absorb:

- Oil
- Water
- Water based chemicals

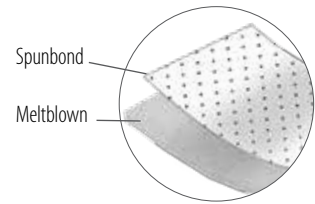

Dark gray pads hide grime, which makes pads last longer.

High-strength, low-linting sorbents are used where added durability is a must.

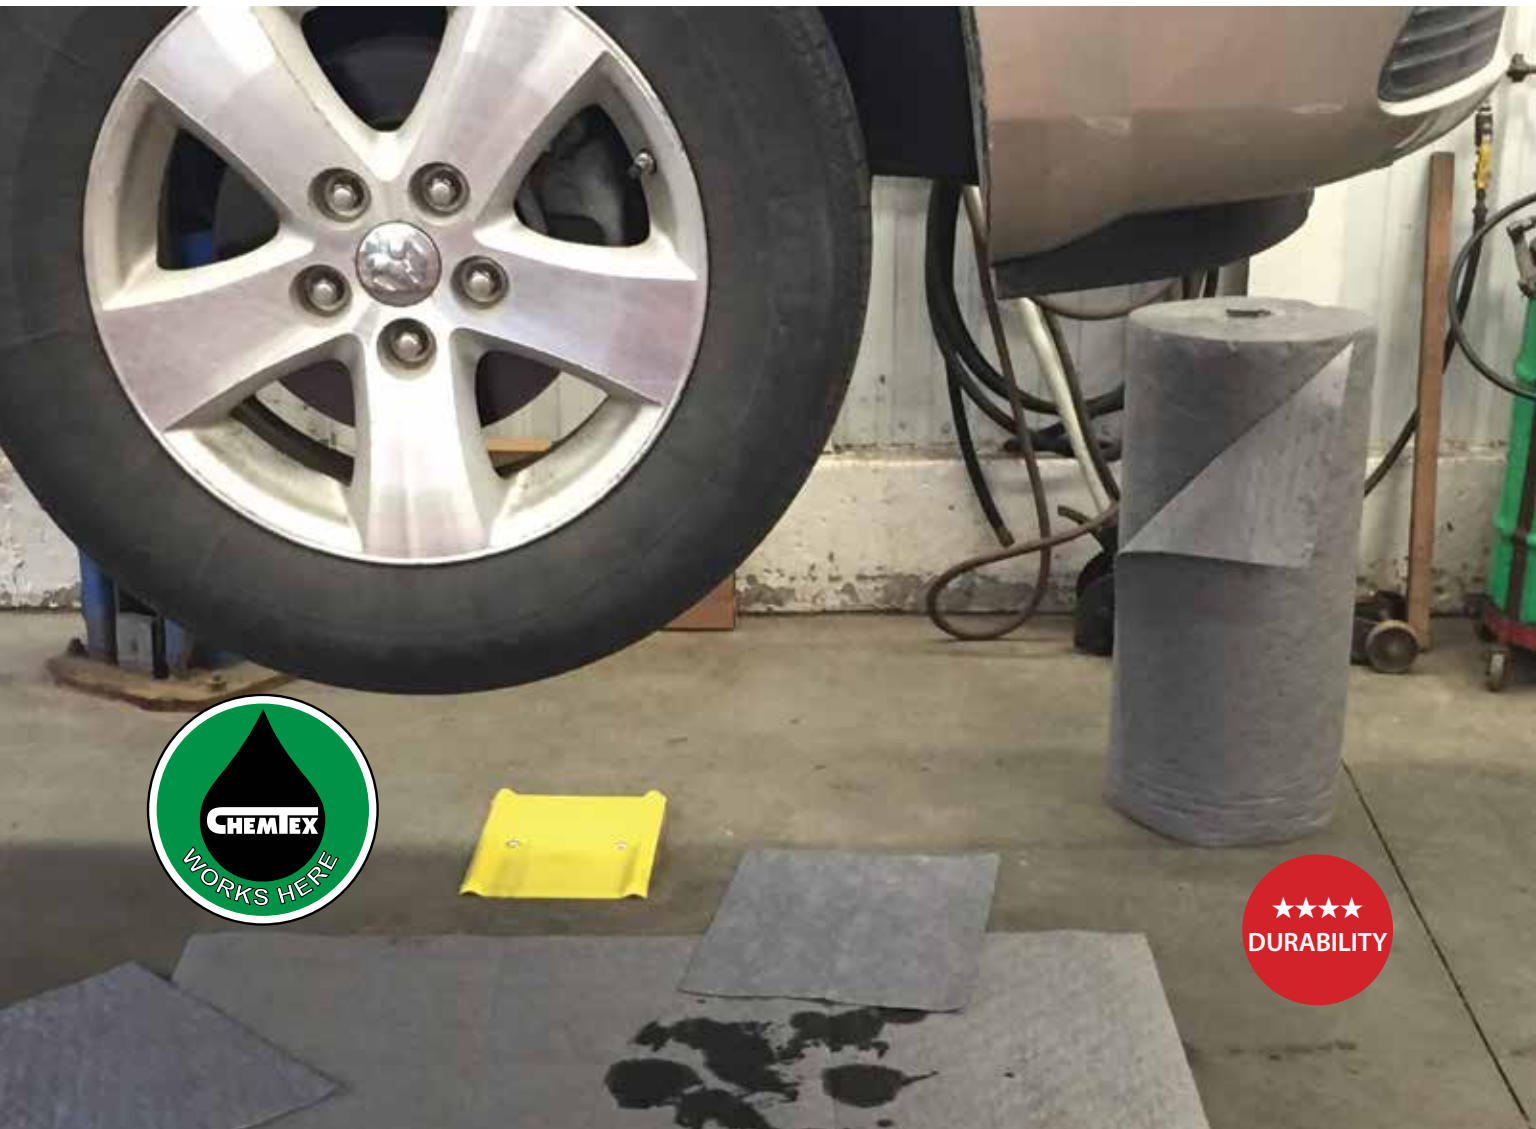

The smooth, fine fiber surface adds the strength needed for high-traffic areas.

Universal Bonded Meltblown (SM) Pads & Rolls

Low-linting & highly absorbent

One layer of spunbond fabric is bonded to a single layer of meltblown polypropylene.

- ◆ Stronger tensile strength than the dimpled pads & rolls
- ◆ One side is lint-free that can be used for wiping
- ◆ Perforated every 7.5" vertically and 19" horizontally to waste less

APPLICATIONS:

- Industrial
- Automotive

ABSORBS:

- Oil
- Water
- Water-based chemicals

✓ **DURABLE**
✓ **MULTI-PERFORATIONS**
USE LESS SAVE MORE

Bonded (SM) Pads & Rolls share the same features as our dimpled meltblown pads and rolls, plus an extra layer of spunbond polypropylene that is bonded to the top to make the pads and rolls low-linting on one side and highly absorbent on the opposite side.

The bonding process increases the strength and durability of the pads and rolls so they can be perforated like a paper towel. Perforations will help reduce waste and allow you to use the exact amount needed for the job.

These pads and rolls are the best of both worlds—the lint-free top sheet side can be used to clean and wipe tanks, tools, walls, etc. without leaving lint, you also can use the meltblown side for quick absorption of fluids.

sold separately.

Our bonded (SM) sorbents are constructed with 2 layers of polypropylene
1 - Spunbond
2 - Meltblown

Universal pads & rolls are used to absorb:

- Oil
- Water
- Water based chemicals

Dark gray pads hide grime, which makes pads last longer.

Lint free top sheet makes it stronger and more versatile than standard meltblown.

Universal Dimpled Meltblown Pads & Rolls

Single layer of dimpled meltblown polypropylene

Single layer of dimpled meltblown polypropylene.

- ◆ Stronger than Standard Meltblown pads & rolls
- ◆ The dimples reduce linting in pads & rolls
- ◆ Perforated every 7.5" vertically and 19" horizontally to waste less

APPLICATIONS:

- Industrial
- Automotive

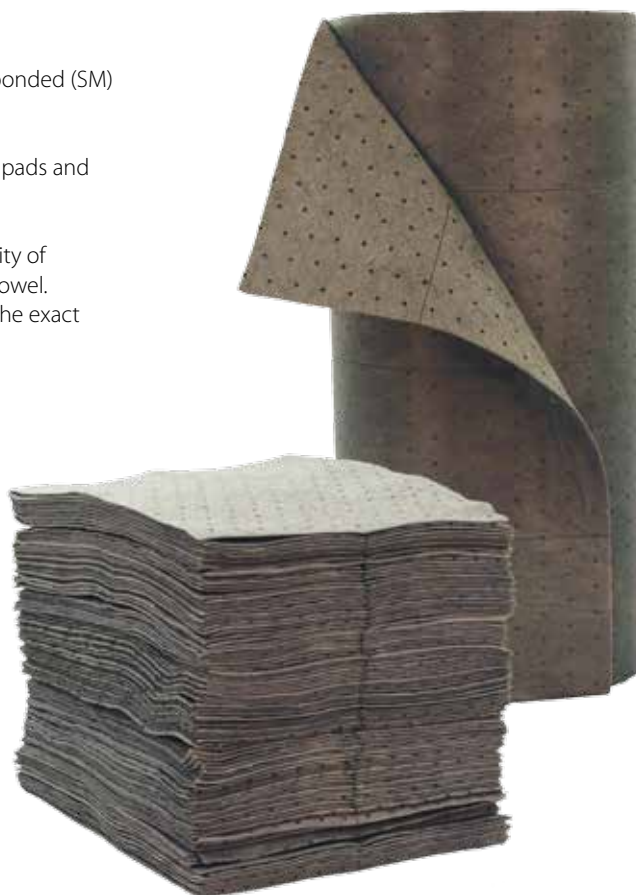

ABSORBS:

- Oil
- Water
- Water-based chemicals

Dimpled pads and rolls share the same features as our bonded (SM) pads and rolls without the added layer of spunbond.

By not adding the extra layer of spunbond, it makes the pads and rolls more economical.

The dimpling process increases the strength and durability of the pads and rolls so they can be perforated like a paper towel. Perforations will help reduce waste and allow you to use the exact amount needed for the job.

✓ **LINT FREE**
 ✓ **EXTRA STRONG**
 ✓ **HIGHEST QUALITY LAMINATED PADS AND ROLLS**

Our most durable sorbent pad and rolls combining two technologies to form one super-strong pad. A thirsty absorbent layer of meltblown is bonded between two layers of lint-free, spunbond fabric.

These lint-free pads and rolls will not contaminate your equipment.

Use in areas that require a durable, long-lasting pad or roll.

The spunbond polypropylene increases the strength and durability of the pads and rolls so they can be perforated like a paper towel. Perforations will help reduce waste and allow you to use the exact amount needed for the job.

Our universal bonded meltblown (SMS) pads & rolls are constructed with 3 layers of polypropylene.

Universal Camo Matting

Camouflage design makes leaks and drips seem to disappear.
Lasts longer than the standard gray and white meltblown rolls.
Strong construction allows you to leave it on the ground for longer lengths of time, which will cut back on your spending.
Spunbond top sheet provides extra strength and durability.
The bottom layer of fine fiber meltblown grips the floor and provides a safe, secure walkway.

Multiple perforations allow you to tear off and use only what you need.

CAMO MATTING APPLICATIONS:

- Industrial
- Automotive

Universal pads & rolls are used to absorb:

- Oil
- Water
- Water-based chemicals

Sticky Back Mats

Needle-punch polypropylene sorbent with a poly coated backing mixed with adhesive.

Our adhesive poly-backed mats absorb:

- ◆ Oils
- ◆ Coolants
- ◆ Solvents
- ◆ Water

Sticks firmly to the floor and leaves no residue after retrieval.

Won't slide or buckle, which prevents accidents.

Cut to size for various aisle lengths.

Light weight for easy transport and deployment.

Wet-vac, brush, or vacuum our product for continued use.

Sticks and removes from the floor with ease.

Fabric collects oil, dirt, mud, and rainwater.

Low-profile design great for preventing tripping.

Durable geotextile is an excellent anti-fatigue matting.

Great for work stations and entrance ways.

Impermeable poly backing stops liquids from leeching through to the floor.

Holds up to foot and forklift traffic.

Industrial Rugs

Manufactured to last

Industrial rugs are used in place of sorbent rolls when durability is a "must." Industrial rugs are manufactured to last. These rugs can withstand foot and forklift traffic much better than traditional sorbent rolls.

Needle-Punch Rug

100% polypropylene.

Withstands constant foot and forklift traffic.

Absorbs oil, water, coolants and solvents.

Also used in decontamination areas on job sites.

Ground Guards

Ground Guards Catch paint chips and oils that run off boats during power washing, general maintenance or painting.

Economical

- ◆ Keep your boatyard clean.
- ◆ Help protect waterways from harmful, contaminated run-off.
- ◆ Two sizes to choose from depending on the size of your boat.
- ◆ Geotextile is made from a high-quality polypropylene.
- ◆ Will not rip or tear.
- ◆ Ground Guards are reusable.
- ◆ Ground Guards act as a filter for contaminants.

Drip Pans & Replacement Pillows

New style drip pan comes with a removable sorbent pillow.

Allows you to keep the pan and just change out the pillow.

Spend less, and you help save the environment.

Low profile makes it easy to fit in tight spaces where leaking spigots are a problem.

Holds up to three-quarters of a gallon.

Replacement pillows sold separately.

Universal Absorbent Socks

Use as a dike to absorb and contain spills around machines or drums.

- ◆ Wrap socks around machinery to act as a dike.
- ◆ Surround the spill, preventing liquids from spreading over the plant floor or down drains.
- ◆ Color-coded to match our pads and rolls for safety and ease of use.

APPLICATIONS:

- Industrial
- Automotive

ABSORBS:

- Oil
- Water
- Water-based chemicals

Universal Maintenance Socks

Our most versatile sock.

Specially treated to absorb oils, coolants, solvents and water based chemicals.

Oil Only Fine Fiber Meltblown (FMF) Pads & Rolls

The highest quality pads & rolls we manufacture

Two layers of low-linting fine fiber polypropylene are bonded around a meltblown polypropylene core.

- ◆ Super-strong tensile strength
- ◆ Very low lint
- ◆ Grips floors
- ◆ Perforated every 7.5" vertically and 19" horizontally to waste less

APPLICATIONS:

- Marine Spills
- Outdoor Spills
- Indoor Spills & Overspray

ABSORBS:

- Oil
- Petroleum Based Chemicals

Both pads and rolls are used to contain and absorb splashes and spills under and around machinery.

The fine fiber polypropylene increases the strength and durability of the pads and rolls so they can be perforated like a paper towel. Perforations will help reduce waste and allow you to use the exact amount needed for the job.

Using fine fibers increases strength, which enables pads and rolls to grip surfaces securely.

Our Oil Only Fine Fiber Meltblown (FMF) Pads & Rolls are constructed with 3 layers of polypropylene.

- 1 - Fine fiber
- 2 - Meltblown Core
- 3 - Fine fiber

Oil only pads & rolls are used to absorb:

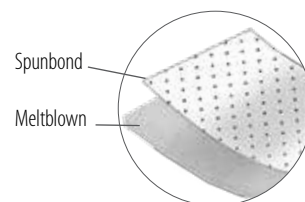

- Oil
- Petroleum-based chemicals

Smooth, fine fiber surface adds the strength needed for high-traffic areas.

High strength low linting sorbents are used when durability is a must.

Oil Only Bonded Meltblown (SM) Pads & Rolls

Low-linting & highly absorbent

One layer of spunbond fabric is bonded to a single layer of meltblown polypropylene.

- ◆ Stronger tensile strength than the dimpled pads & rolls
- ◆ One side is lint-free that can be used for wiping
- ◆ Perforated every 7.5" vertically and 19" horizontally to waste less

APPLICATIONS:

- Marine Spills
- Outdoor Spills
- Indoor Spills & Overspray

ABSORBS:

- Oil
- Petroleum Based Chemicals

USE LESS SAVE MORE

Bonded (SM) pads and rolls share the same features as our dimpled meltblown pads and rolls, plus an extra layer of spunbond polypropylene that is bonded to the top to make the pads and rolls low-linting on one side and highly absorbent on the opposite side.

The bonding process increases the strength and durability of the pads and rolls so they can be perforated like a paper towel. Perforations will help reduce waste and allow you to use the exact amount needed for the job.

These pads and rolls are the best of both worlds—the lint-free top sheet side can be used to clean and wipe tanks, tools, walls, etc. without leaving lint, but you also can use the meltblown side for quick absorption of fluids.

Lint free top sheet makes it stronger and more versatile than standard meltblown.

Oil Only Dimpled Meltblown Pads & Rolls

Single layer of dimpled meltblown polypropylene

Single layer of dimpled meltblown polypropylene.

- ◆ Stronger than Standard Meltblown pads & rolls
- ◆ The dimples reduce linting in pads & rolls
- ◆ Perforated every 7.5" vertically and 19" horizontally to waste less

APPLICATIONS:

- Marine Spills
- Outdoor Spills
- Indoor Spills & Overspray

ABSORBS:

- Oil
- Petroleum Based Chemicals

Our **Dimpled Sorbents** are constructed with one Layer of meltblown polypropylene. **Oil Only pads and rolls are used to absorb** oil, gasoline and other oil-based chemicals. **Dimpled pads and rolls** share the same features as our Bonded (SM) pads and rolls without the added layer of spunbond. By not adding the extra layer of spunbond, it makes the pads and rolls more economical.

The dimpling process increases the strength and durability of the pads and rolls compared to standard meltblown.

Perforated to help reduce waste. Allows you to use the exact amount needed for the job.

Oil Only Bonded Meltblown (SMS) Pads & Rolls

Constructed with 3 layers of polypropylene

Three layers, bonded together: 2 layers of lint-free spunbond fabric with a 1 layer meltblown core.

- ◆ Stronger tensile strength than the standard, dimpled, bonded and fine fiber pads & rolls
- ◆ Two sides of lint-free spunbond that can be used for wiping

- Petroleum Based Chemicals

These pads and rolls are **Oil Only** and can be used to remove oil off water.

Used to absorb oil, gasoline and other hydrocarbon-based chemicals.

Our most durable sorbent pad and rolls combining two technologies to form one super-strong pad. A thirsty absorbent layer of meltblown is bonded between two layers of lint-free, spunbond fabric.

These lint-free pads and rolls will not contaminate your equipment.

Use in areas that require a durable, long-lasting pad or roll.

The spunbond polypropylene increases the strength and durability of the pads.

Perforated to reduce waste and allow you to use the exact amount needed.

Oil Only Pads & Rolls are used to absorb:

- Oil
- Petroleum based chemicals

Bonded meltblown (SMS) construction layers:

- 1 - Spunbond
- 2 - Meltblown
- 3 - Spunbond

EXTRA TOUGH

Oil Only Boom XT

Are you using sorbent boom near rocky shoreline?

Does the tide go out and leave your boom lying high and dry on a rocky bottom?

Rocks and barnacles will rip and tear standard sorbent booms and cause the shredded polypropylene to release, making more of a mess than when you started.

Introducing the Boom XT

- Made from HDPE netting
- Stronger than traditional boom nets
- UV-treated to protect the polypropylene from the sun's damaging UV rays

If you are working in harsh marine environments, you need Boom XT.

Railroad Track Matting

Railroad maintenance yards are prone to leaks and spills. Use our RR track mats to absorb oils, fuels and other hydrocarbon-based fuels.

Strong 3-ply construction

- 1 layer UV-resistant, extra tough needle-punch polypropylene
- 1 layer oil only cotton
- Poly backing to prevent seepage from contaminating the ground

Use the two 19" rolls outside the tracks and the 59" roll between the rails.

Can be used to absorb oil, fuels and other hydrocarbon-based fuels in railroad yards.

Can also be used as a barrier matting in garages and service centers.

MOST DURABLE

Poly Backing prevents fluids from soaking through to the ground.

SMP Track Mat

The ultimate barrier sorbent used most commonly in railroad maintenance yards.

Can also be used as a barrier matting in garages and service centers.

The 3-ply construction consists of:

- a tough UV-resistant spunbond top sheet
- a highly absorbent oil-absorbing meltblown polypropylene on the inside
- a super strong impermeable polyurethane bottom sheet

Sized to fit between a set of railroad tracks.

Equipment Diaper

Used to protect flooring and or the environment from oil and petroleum leaks caused by leaking equipment and machinery. A replaceable sorbent pad in the center of each Equipment Diaper collects the fluids that may leak from the chassis of the equipment while the durable PVC containment sheath prevents any leaked fluids from hitting the ground even when fully saturated. Use the Diaper on the ground or secure it to the chassis using bungee cords through the precut grommets on all 4 corners.

OIL ONLY EQUIPMENT DIAPERS & OILS SNARES

Oil Snare™

Patented loop design on ribbon yarn ensures maximum absorption. This keeps the oil entrapped with much less "run off" than competing pom-poms. Developed for the recovery of Bunker C, Crude Oil, and Numbers 4, 5 & 6 oil.

Utilizes the oil's natural stickiness to entrap it within thousands of plastic tentacles. Operative even in subfreezing conditions.

Made up of flat polypropylene ribbon yarn configured into two different products (Oil Snare Singles, Oil Snare on a Rope).

Hydrophobic, oleophilic, nontoxic or corrosive, non-scattering, inert, floats (will not sink) indefinitely.

Resistant to rot and mildew after long storage and does not have a shelf life.

Can be drained or doused with #1 or #2 oil which removes the heavy oils, allowing units to be reused if desired, and allowing recycling of extracted oil as downgraded fuel.

Oil Only Absorbent Socks

Use to absorb and contain spills around machines or drums

- ◆ Wrap socks around machinery to act as a dike.
- ◆ Surround the spill, preventing liquids from spreading over the plant floor or down drains.
- ◆ Color-coded to match our pads and rolls for safety and ease of use.

APPLICATIONS:

- Marine Spills
- Outdoor Spills
- Indoor Spills & Overspray

ABSORBS:

- Oil
- Petroleum Based Fluids

Oil Only Socks

Will not absorb water or water-based chemicals, use outdoors if need be.

Highly absorbent and dust-free.

Helps keep a clean and safe working environment.

Use these socks to surround spills and stop migration or to contain spills around machines and drums.

Use in boat bilges of all sizes.

Use the 8" x 18" in larger commercial size boats.

Use the 5" x 15" in smaller pleasure crafts.

Highly absorbent mini booms will help prevent pollution of our marine waters.

These Mini Booms will absorb oils and fuels from contaminated bilge waters.

Hazmat Fine Fiber Meltblown (FMF) Pads & Rolls

The highest quality pads and rolls that we manufacture.

Three layers bonded together: 2 layers of low-linting fine fiber polypropylene with a 1 layer meltblown core.

- ◆ Super-strong tensile strength
- ◆ Very low lint
- ◆ Grips floors
- ◆ Perforated every 7.5" vertically and 19" horizontally to waste less

Fluids Absorbed

- Acids & Bases
- Aggressive Chemicals
- Oils
- Solvents
- Citric Acid
- Water-based Chemicals
- Sodium Hydroxide
- Other Unknown Liquids

✓ LOW LINT
✓ EXTRA STRONG
✓ HIGH VIZ YELLOW COLOR

**SAFETY
FIRST!**

High-strength, low-linting sorbents are used where added durability is a must.

The smooth, fine fiber surface adds the strength needed for high-traffic areas.

Using fine fibers increases strength, which enables pads and rolls to grip surfaces securely.

These are the highest quality pads and rolls that we manufacture.

The fine fiber polypropylene increases the strength and durability of the pads and rolls so they can be perforated like a paper towel.

Hazmat Fine Fiber Meltblown (FMF) Pads & Rolls

Constructed with 3 layers of the highest quality polypropylene
1 - Fine fiber
2 - Meltblown
3 - Fine fiber

RHYFF1502	FFR12Y-2	Heavy Weight Rolls	15" x 150'	Yellow	Up to 47 gal	2 Rolls

- High-strength
- Low-linting
- Added durability

Smooth, fine fiber surface

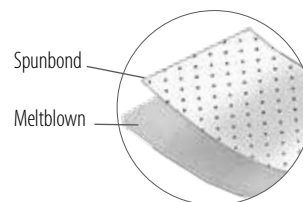

- adds the strength
- Great for high-traffic areas
- Grips surfaces securely

Perforated

- Helps to reduce waste
- Allows use of the exact size needed for the job

Hazmat Bonded Meltblown (SM) Pads & Rolls

Ideal for responding to spills of unknown liquids.

Two layers bonded together: 1 spunbond fabric layer, 1 polypropylene layer.

★★★★
DURABILITY

- ◆ Stronger tensile strength than the dimpled pads & rolls
- ◆ One side is lint-free that can be used for wiping
- ◆ Perforated every 7.5" vertically and 19" horizontally to waste less

FLUIDS ABSORBED

- Acids & Bases
- Aggressive Chemicals
- Oils
- Solvents
- Citric Acid
- Water-based Fluids
- Sodium Hydroxide
- Other Unknown Liquids

✓ **DURABLE**
 ✓ **MULTI-PERFORATIONS**
USE LESS SAVE MORE
 ✓ **HIGH VIZ YELLOW COLOR**

Bonded (SM) pads and rolls share the same features as our dimpled meltblown pads and rolls, plus an extra layer of spunbond polypropylene that is bonded to the top to make the pads and rolls low-linting on one side and highly absorbent on the opposite side.

The bonding process increases the strength and durability of the pads and rolls so they can be perforated like a paper towel.

Perforations will help reduce waste and allow you to use the exact amount needed for the job.

These pads and rolls are the best of both worlds—the lint-free top sheet side can be used to clean and wipe tanks, tools, walls, etc. without leaving a mess, but you also can use the meltblown side for quick absorption of fluids.

Alert CAUTION Sorbent Pads, Rolls, Pillows, and Socks

Studies show that slips and falls are a leading cause of workplace injuries and deaths. With this in mind, facilities should be supporting efforts to create and maintain a safer work environment for their staff.

Safety first! Caution pads, rolls, socks, and pillows are made with a bright yellow polypropylene fabric and can be used to absorb, oil, water, and hazardous chemicals. The bright yellow color with the wording "CAUTION" in multiple languages helps to alert employees. Alerting employees will help prevent accidents from happening while promoting a culture of safety in your work place.

- High-visibility mat design features multilingual safety messages and symbols to alert workers about potential workplace hazards
- Abrasion-resistant top layer on the pads and rolls gives strength for everyday cleanup jobs

Newly designed flat socks are super thirsty. The flat design makes it less of a trip hazard and takes up much less space while storing.

- Universal absorbency means one product for multiple liquids
- Quickly absorbs leaks, spills and overspray to keep floors dry

Overpack Spill Kits on Wheels

Wheeled overpack spill kits are very popular in industrial plants and factories. Since you can't bring the spill to the kit, bring the kit to the spill with a wheeled overpack.

Both the 95 gallon and 50 gallon models allow the user to maneuver ample absorbents wherever a spill occurs.

Marine Spill Response

We carry a variety of containment booms and accessories to help aid in the protection of our waters and shorelines.

The oceans cover 71 percent of the earth's surface and contain 97 percent of the earth's water.

With this in mind, we need to make sure we protect them and keep them clean for generations to come.

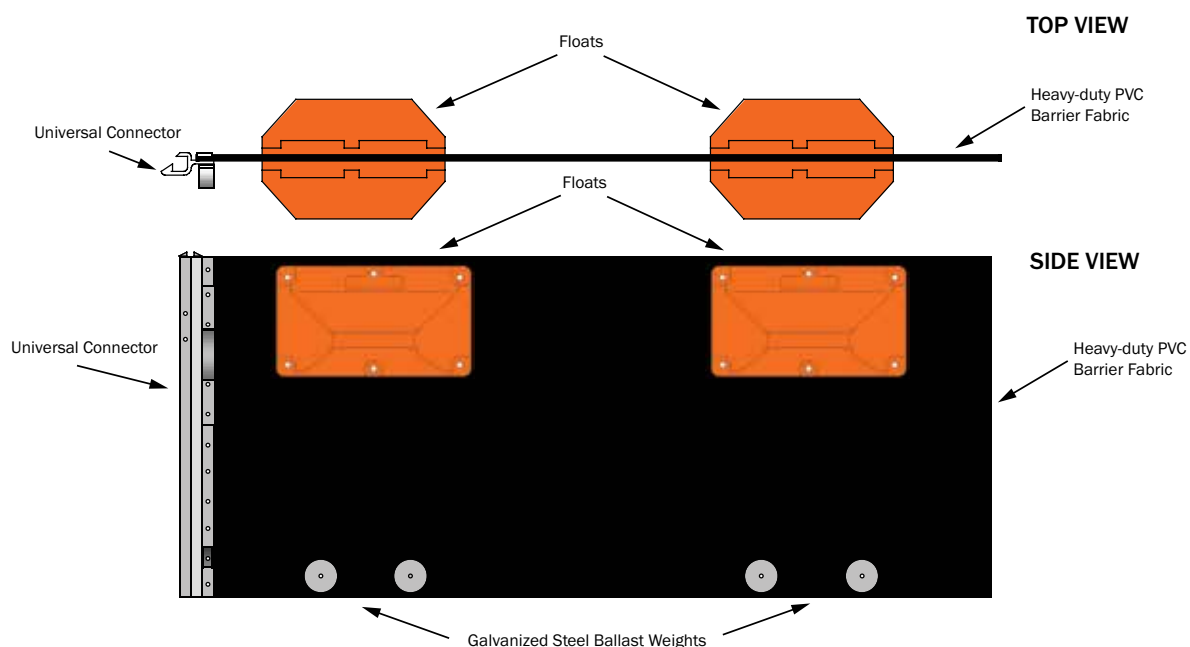

Permanent Containment Boom

The economical solution to provide continuous facility protection and containment. This permanent boom system features easy deployment, high visibility, and abrasion resistance. Permanent containment booms are designed for deployment at permanent sites such as waterfront oil handling facilities, or around ships in repair or storage. This containment boom is more economical, lighter weight per foot, and has a higher buoyancy-to-weight ratio than other permanent booms.

Long Term Use

Short Term Use

Response Boom

Use containment booms to surround and contain oil or sewage spills.

Also used to retain debris.

Can be used in fresh or salt water.

Ideal for holding ponds, marinas, or spill response teams.

Boom in a Bag

Ever find yourself needing a containment boom in a pinch, but you don't have the manpower to deploy the standard 18" containment boom? Or maybe an 18" boom is just too much for the job. Our Boom in a Bag is the perfect solution. This highly compact, featherlight response boom is great for small spills of all kinds. Boom in a Bag has 50' of 8" containment boom, which consists of a 3" float and a 5" skirt. Made out of 22 oz PVC, this boom uses lightweight, easy-to-use slotted tube connectors for easy connections. Stored in a PVC bag, one person is all it takes to carry and deploy. Great for marinas, because it won't take up much space. In fact, this boom could be stored in a closet or in the back of a pickup truck.

Boom Accessories

Danforth® Anchors

Danforth® anchors are used to secure booms to the ocean floor. This anchor has the traditional holding power which has always been associated with Danforth® anchors. The shank is made of high-strength steel. The steel flukes are strong and wide. Each anchor has a hot-dipped, galvanized coating for long-lasting protection.

Oil Snare™

Patented loop design on ribbon yarn ensures maximum absorption. This keeps the oil entrapped with much less "run off" than competing pom-poms. **Developed for the recovery** of Bunker C, Crude Oil, and Numbers 4, 5 & 6 oil.

Utilizes the oil's natural stickiness to entrap it within thousands of plastic tentacles.

Operative even in subfreezing conditions.

Made up of flat polypropylene ribbon yarn configured into two different products (Oil Snare Singles, Oil Snare on a Rope).

Hydrophobic, oleophilic, nontoxic or corrosive, non-scattering, inert, floats (will not sink) indefinitely.

Resistant to rot and mildew after long storage and does not have a shelf life.

Can be drained or doused with #1 or #2 oil which removes the heavy oils, allowing units to be reused if desired, and allowing recycling of extracted oil as downgraded fuel.

Oil Snare will typically recover from 20 to 60 times its own weight, depending on the viscosity of the oil. The thicker the oil, the better Oil Snare adsorbent will work.

Wipers & Rags

Use knit rags or non-woven wipers to keep tools and equipment clean and looking good.

Since the beginning of the industrial revolution, manufacturers have used knit rags to keep tools and equipment clean and looking good. Another common use is for personal hygiene while working on dirty jobs. In addition to the traditional knit rags, we also have a great selection of non-woven wipers that are much more efficient to use in this day and age. Wipers come in a variety of sizes and put-ups. Choose the wipe best suited to your needs.

Spunlace Wipers

No more expensive shop towels

Are you renting your shop rags from a uniform/linen rental company? Are you tired of getting overage charges on your monthly bills for lost rags? Ever wonder how you could lose so many rags? Do you find that each month there are extra charges for a damage fee, energy charge, delivery charge, replacement fee, or environmental/fuel surcharge? Rental companies are notorious for all of these extra fees. When you buy a disposal wiper that works just as well, if not better, you can eliminate all of those "add-on" charges. In addition to the obvious cost savings, there is also a real benefit that will help to ensure the safety of your employees or equipment. Metal shavings, oils and hazardous chemicals can be present on "clean" laundered rental shop towels, presenting both possible hazards to health and the possibility of machinery getting snagged. Spunlace wipers are great on heavy industrial tasks, cleaning oil, grease and grime. Also good for wiping solvents and cleaning rough surfaces.

Granulars, Polymers, Neutralizers & Bioremediation

Granulars are used to clean the residuals from a spill that pads and rolls just won't get.

Some specialty granulars like hydrocarbon solidifiers will actually encapsulate oils, which is much better for the environment compared to being absorbed by traditional sorbents. Our large variety of specialty granulars will not only absorb hazardous chemicals, but will also neutralize them at the same time. This is something that sorbent pads and rolls won't do.

Mineral-Based Granulars

Mfg #	Model #	Description	Packaging	Units/Pkg
GRAN1000	OIL040	Floor Absorbent	32 qts	60 Bags/Pallet

Floor-Dry

Contains millions of natural microscopic diatom "sponges."

Great, dust-free oil absorbent.

Excellent lab pack media.

A 20-lb bag of Floor-Dry will absorb more than a 40-lb bag of clay.

All-purpose absorbent absorbs most liquids.

GRAN1001	OIL046	Diatomaceous Earth	32 qts	84 Bags/Pallet

Perlite

Perlite is a nontoxic, nonflammable, lightweight, environmentally safe and friendly absorbent that can absorb and hold most liquids, while leaving little or no residue.

Less than half a pound of Perlite can completely absorb one quart of motor oil without leaving any residue to clean up.

Clay, earth and sand products require 15 pounds of material to absorb the same amount and would leave a slippery residue.

Bioremediation

Bioremediation is the process of using microorganisms to digest harmful contaminants and turn them into nontoxic compounds. Nature will heal itself, but it often takes a great amount of time. Using microbes helps speed up this process by concentrating the number of helpful microorganisms within a given area. Microscopic organisms digest hydrocarbons and transform them into harmless carbon dioxide and water. Bioremediation is a safe, natural process that produces no harmful byproducts. Since it can be done on site, it is often more cost-effective than having soil or water hauled away for burning or other reclamation. It is also safer for workers, because no harmful chemicals are used in the process.

Where to use

In Situ or Ex Situ Soil Remediation
Land Farming | Biopiles | Surface Spills

Suitable for

B-Active will rapidly degrade most petroleum hydrocarbons.

- BTEX
- Crude oil
- Diesel
- Gasoline
- Greases
- Heating oils
- Higher-range aromatics
- Jet fuels
- Kerosene
- Lubricating oils
- Motor oil
- PAHs
- Paint thinners
- Tar
- Transmission fluid

Combine microbes with the micronutrients.

The microbes will degrade and digest the contamination, returning the soil to its original uncontaminated state.

Water and carbon dioxide are the resulting byproducts.

B-Active - Bioremediation

B-Active GR and B-Active LR will rapidly degrade most petroleum hydrocarbons with the use of microbial action.

B-Active GR (granular) is used on the surface

B-Active LR (liquid) is used for spills under 2-3" deep

Turn hydrocarbons into rubber!

Our HCS Polymer Booms are ideal for use in the marine environment.

Perfect for use at fuel docks and marinas. The HCS Polymer Boom can be placed in scuppers on ships to prevent hydrocarbon run-off from the decks of commercial vessels, and in engine rooms or bilges to remove oil from water. Booms also can be used on land applications to prevent hydrocarbons from entering storm drains.

A leap beyond absorption!

HCS polymers are used to solidify and suppress harmful vapors of sheen, gasoline, diesel and oils, including crudes, upon contact. The byproduct is a solid, rubber-like material that floats in water. Environmentally friendly, HCS polymer has been tested not harmful to aquatic life and waterfowl. The solidified byproduct is 100% recyclable as raw material for rubber and plastic production or asphalt, or can be burned as fuel.

Depending on your local and state regulations, HCS polymer also can be disposed of in a landfill. Other uses and applications are in the utility industry for SPCC Secondary Containment, and in oil contamination removal in underground vaults and manholes; HCS polymer also can be used to filter water in storm drains or industrial waste streams.

- Nontoxic, non-carcinogenic, noncorrosive, nonhazardous
- Non-biodegradable; encapsulated waste will not produce a hazardous leachate
- Solidifies up to 8 times its own weight
- Versatile — hydrophobic by nature, so you can use it to clean spills on both land and water
- Safe and easy disposal

Super Absorbent Aqueous Polymer

Minimal Volume & Weight Increase = Lower Transportation & Disposal Costs

Used for cleaning water-based spills and sludge stabilization. Hazardous and nonhazardous industrial waste streams often must be solidified and stabilized to pass the paint filter test prior to placement in appropriately permitted landfills. Industrial solidification traditionally has involved the addition of various agents, including kiln dust, saw dust and portland cement. This significantly increases the volume of material requiring transportation and disposal. The polymers solidify industrial liquid wastes with a nominal volume increase and ensures that liquid wastes pass the paint filter liquids test. Given the capacity to retain substantial volumes of water, there is limited increase in weight of solidified mass, thereby minimizing transportation and disposal costs.

Used in the solidification and removal of hazardous, nonhazardous and radioactive waste, super absorbent polymers are finding new uses in industry. Our polymers have been proven to be more cost-effective than alternatives on the market. In fact, Super Absorbent Polymers can absorb up to 275 times their weight in liquid. (Also available in super sacks.)

Aqueous Polymer/Bentonite Blend

Rapid solidification of aqueous sludge streams with residual organics and petroleum contamination

This is a blend of super absorbent aqueous polymers, bentonite and organoclay. The polymers will absorb up to 275 times their weight in water, and the bentonite clay will absorb the oil. This product is great for sludge stabilization prior to and during transportation. If you have hydrocarbons mixed in with your sludge, the aqueous polymer alone will not work; bentonite is needed to absorb the hydrocarbons.

Acid and Base Neutralizing Polymers: Pads, Socks, Pillows & Granulars

Used to neutralize and solidify a wide range of both acid and base spills, thus reducing the risk of possible workplace injuries. These highly effective spill control products contain a neutralizer, pH indicator and a super absorbent polymer to safely clean up aggressive chemical spills. Its unique formula reacts with the spilled chemical, converting the fluid into a gelled mass for safe, easy cleanup. A color change will appear letting you know that neutralization is taking place. Neutralizers are available in pillows, socks, pads and granular form.

Acid Neutralizing Spill Kit

All absorbents in this specially designed kit both neutralize and soak up acidic spills; cleanups are more complete and safer. Use socks to confine spill before it can spread; use pads, pillows and granular neutralizer to soak up spill. Not for use on hydrofluoric acids.

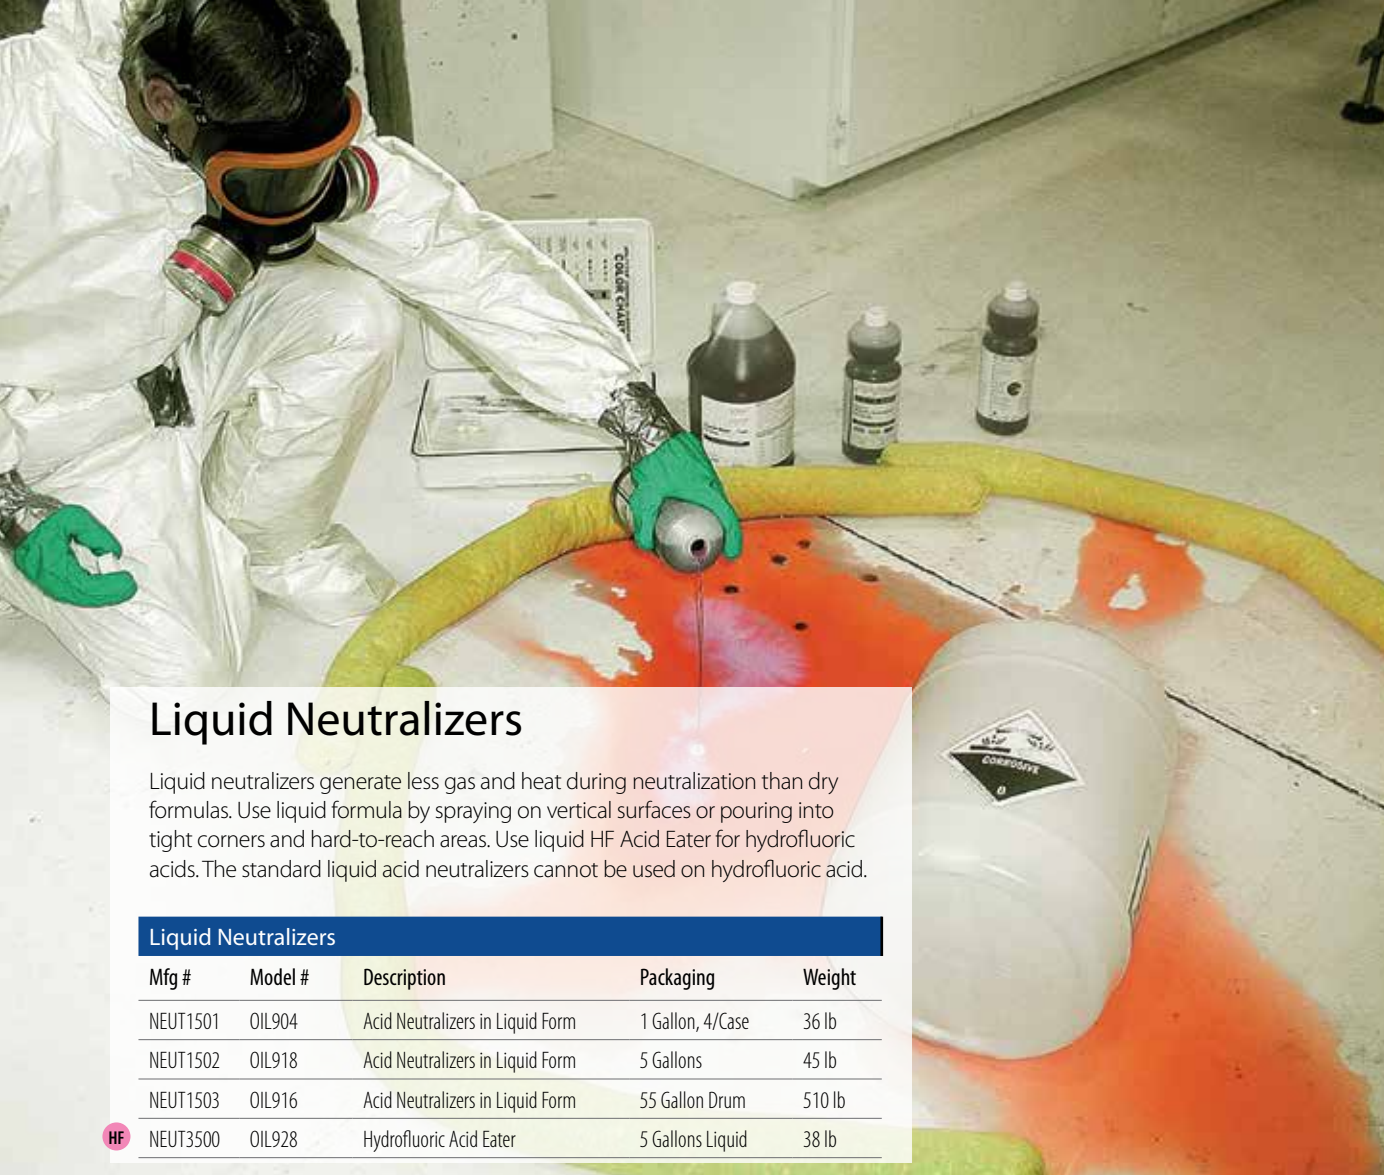

Kit Contents

- 10 11" x 12" Acid Encapsulating/Neutralizing Mats
- 2 2" x 4' Acid Neutralizing Socks
- 2 12" x 12" Acid Neutralizing Pillows
- 2 2 lb Shaker Bottles Granular Acid Neutralizer

HgX® Mercury Decontaminant Powder

For the reduction of toxic mercury vapor, HgX® is an inexpensive, water-soluble, nonhazardous, metallic-mercury/sulfide-converting powder with a chelating compound and dispersing agent. It reacts rapidly, forming a film over the finely divided, nearly invisible beads of mercury and reacting to produce a - sulfide. Further, HgX® keeps on working. Particles of HgX® left on cleaned surfaces are reactivated during subsequent cleaning.

HgX® is not harmful. None of its components are classified as toxic. It leaves no odor. No allergic reactions have ever been reported, even after continuous use under various conditions.

HgX® is stable. It is supplied in polyethylene drums and can be stored safely up to one year without any loss of activity.

Drain Guards

Storm water drain guard is designed for use in industrial facilities, construction sites and parking lots. Contains an oil-absorbent pillow that removes oils and greases from water flow as it passes through the drain guard. Nonwoven fabric removes dirt, sand and other sediments from storm water. Absorbs up to .87 gallons of oil and holds up to 40 pounds of sediment.

Inflatable Pipe Plugs

Multi-size pipe plugs reinforced with Kevlar® have a wide application range. Plugs are made from a high-quality Neoprene rubber that will stand up to hydrocarbons. Each plug covers several pipe sizes. Multi-size ranges overlap for more user selectivity. For pipes from 8" diameter to 24" diameter. These sizes work on most municipal storm drains and sewers. Plugs are flexible and bend easily around tight corners or when installing through manholes.

Plug accessories are sold separately — please call our office for details.

Flood Barrier

Flood Barriers

Divert problem water away from your home or business. Self-activating flood barriers— simply expose them to fresh water. They absorb water and grow to full size at 3.5" high in 5 minutes. Swelled barriers contain and divert flood water. Leave in place for ongoing protection. Lasts for up to 8 months of continuous use. Safe, nonhazardous and nontoxic, environmentally friendly and decomposes over time.

Not for use in salt water

- Ready to use, activates and grows when wet.
- Compact and lightweight.
- No sand or labor needed.
- Reusable and lasts for months, leave in place for ongoing protection.
- Reactivates when wet and evaporates when dry
- Safe, nonhazardous and nontoxic, environmentally friendly
- Stagger multiple H2O Dams to build a retaining wall
- Compared to heavy traditional sand bags, you can carry several of these at a time, making your job much easier

Grab & Go Flood Protection Kit

This kit is designed for quick and easy deployment when timing means everything. The compact container takes up minimal space and is ideal for rapid emergency deployment. Store in closets, cabinets, vehicles and more. The bucket can be used to preactivate your H2O Dams/Flood Barriers—just add water to the bucket and go!

Spill Pallets

Containment of hazardous materials is required for the protection of the environment from contamination, as well as for the protection of employees who work in areas where hazardous materials are stored and used. If you have an area where you are storing drums or where hazardous materials are dispensed into containers, spill pallets are a great form of secondary containment. Choose the right size spill pallet according to how many gallons you are storing in one place.

Rescue Tape®

Got a leaking hose? Wrap it up tight with silicone tape!
Just stretch, wrap & get rescued. Seals Leaks Fast!

- 950 PSI tensile strength
- Resists 500° F
- Resists fuels, oil, acids, solvents, salt water, road salt, UV rays
- Insulates 8,000 volts

Most versatile tape on the market, even better than duct tape. Repair leaking hoses and insulated wires, or use it in place of heat shrink tubing. This is a self-fusing silicone repair product for emergencies and all-purpose repairs. By wrapping it around and onto itself, Rescue Tape® will quickly and easily create a permanent, airtight, watertight seal in just minutes or even seconds. You can repair leaks on hoses, pipes and air lines, or use it on electrical wiring and as shrink wrap.

H2OZorb

Pull water from fuel tanks before it causes damage.

Maintain peak performance and prevent engine failure. H2OZorb sorbent pulls in water that collects in fuel tanks before it can cause damage. Helps preserve engine life and prevent frozen lines by removing water from fuel stores; also minimizes filter-clogging rust and algae. Ballast forces H2OZorb to bottom of tank, where unwanted water settles; highly absorbent filler pulls in water, but repels gas and diesel fuel. The tough nylon line makes deployment and retrieval easy. Choose from four sizes.

Warranty and Disclaimer: There are no express warranties which extend beyond the description on the face hereof. Seller disclaims any implied warranties of merchantability or of fitness for any particular purpose. Since seller cannot control the use of its products after their resale, seller will not be responsible for any consequential or indirect damages. Rather, seller will, at its option, either replace the products sold or refund the purchase price. No warranties will apply if the products are in any way altered or modified after delivery by seller. Sorbent capacities vary depending on the types of fluids being absorbed.

Handling, Storage, and Disposal: Handling, storage, and disposal of products must be carried out in compliance with all local, state, and federal regulations. Various sorbed fluids may be toxic or hazardous in nature and should be disposed of in the approved manner.

Warning: Flammable and other hazardous liquids when contaminated in any sorbent material continue to be unsafe and are subject to spontaneous ignition. Appropriate respiratory devices and protective clothing should be worn. Exercise extreme care when handling, storing, and disposing of absorbent materials containing such liquids to avoid personal injury and environmental pollution.
